DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 42 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Pacione (US Patent 4,974,384).

Pacione discloses a structural assembly system comprising joists 32, panels 40 and cover sheet 50. As shown in Fig. 2, panels 40 are provided with hooks 27 and loops 29 which serve to anchor or reversibly fix panels 40 to joists 32 and cover sheet 50 to panels 40 in the manner claimed by the applicant (see col. 4, lines 3–47).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2–41 and 43–54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pacione as described above in paragraph 2.

Art Unit: 1734

Without the disclosure of unexpected results, it is the examiner's position that the various materials and physical properties of the materials recited in applicant's claims are well known and convention in the art. Therefore it would have been obvious to one having ordinary skill in the art to employ such materials in the system of Pacione described above based on desired physical properties of the materials being manufactured.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 recites the limitation "the coherent adhesive layer" in lines 2-3. There is insufficient antecedent basis for this limitation in the claim.
